

The IEC 62955 standard at a glance

CC613 charge controller with integrated RDC-M module

- Describes and regulates the 6 mA Residual Direct Current Detecting Device (RDC-DD) in charging mode 3 (AC charging)
- The CC613 includes an RDC-DD module acc. to IEC 62955 with patented measurement technology
- The RDC-DD must be tested together with a switching element
- It is mandatory to use an RDC-DD together with an RCD type A
- Only a DC fault current > 6 mA may cause tripping

Standard-compliant and VDE-certified products
